

Beechcraft B33 Debonair (Model 35-B33)

Airframe Airworthiness Directives

This is a print-friendly reference list of airframe-only ADs applicable to the B33 Debonair family. Engine, propeller, appliance, avionics and STC-specific ADs are intentionally excluded. Always verify applicability against your aircraft serial number and current FAA DRS before maintenance.

AD 62-08-03 – Control wheels inspection/replacement.

AD 70-03-05 – Control wheel inspection (turning type takeoffs).

AD 72-11-02 – Engine mount/firewall area inspection for cracking and related structure.

AD 72-18-01 – Landing gear uplock rollers inspection/replacement.

AD 72-22-01 – Landing gear uplock roller modification.

AD 75-05-02 – Beryl Aviation filtrator assembly replacement (only if STC installed).

AD 79-22-01 – Ruddervator/elevator control system hardware inspection (where applicable to straight-tail models).

AD 94-20-04 – Wing attach structure inspection (applicable models/serials).

AD 2020-24-05 – Ruddervator/elevator balance weight inspection on affected Beech models (where applicable).

Note: Final applicability depends on serial number, installed options, STCs, and prior compliance. Consult the FAA Dynamic Regulatory System and the Beech Model B35 airframe AD compilation.
